1 Outline and in flux

2 Introduction

Models incorrectly predict positive vapor pressure trends in semi-arid regions (Simpson et al., 2024).

3 Methods

4 Results and Discussion

5 Conclusions

Open Research Section

This section MUST contain a statement that describes where the data supporting the conclusions can be obtained. Data cannot be listed as "Available from authors" or stored solely in supporting information. Citations to archived data should be included in your reference list. Wiley will publish it as a separate section on the paper's page. Examples and complete information are here: [https://www.agu.org/Publish with AGU/Publish/Author Resources/Data for Authors](https://www.agu.org/Publish-with-AGU/Publish/Author-Resources/Data-for-Authors)
