

Supplementary information for “Constrained circulation ensemble”

D. Kennedy

October 7, 2025

Figure S1: A plot showing monsoon period temperature and precip in the CCE, LENS2, and observations, including maps

Figure S2: A plot to validate the study design, specifically zonal winds

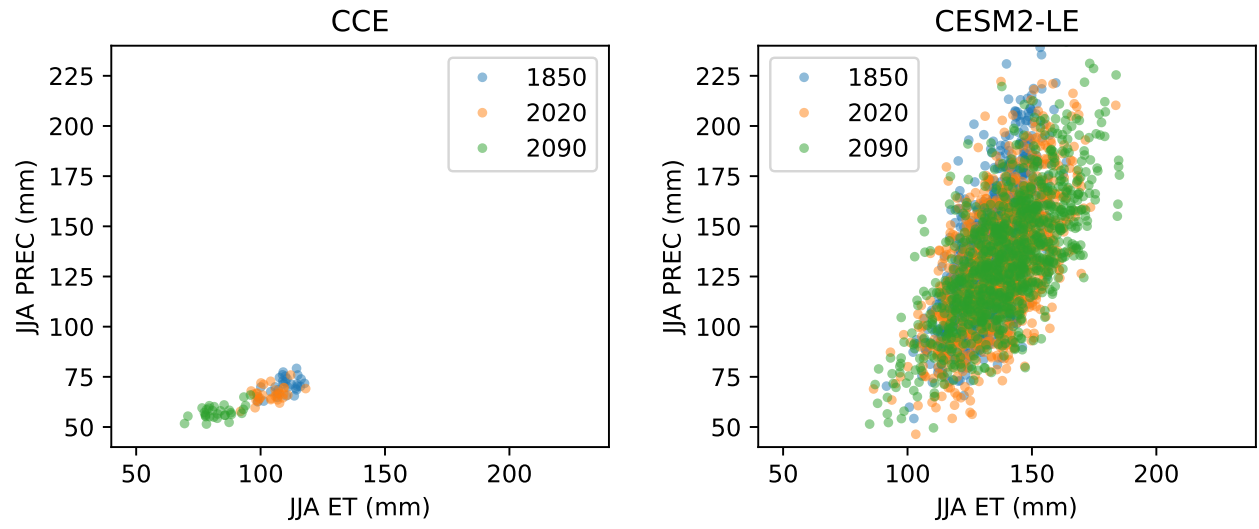

Figure S3: JJA precipitation vs. evapotranspiration, as in main text Figure 2, but instead of only showing the drought years, here we present all the data from the CESM2 large ensemble.
